

Discussion starters Chapter 7

1. John Mulinde from Uganda was surprised to find that family prayer was not commonplace in the West. What are the dangers that children and adolescents in the West face today? Do you think regular family prayer could make a difference? Why/why not?

2. If you have children living at home, do you ever have times of family prayer? How have they been beneficial? If you don't have regular family prayer times, why not? What is stopping you? Could you discuss it with your family and make a plan to include it in your routine? If you know of any single or lonely people who might appreciate being included, could you invite them along?

3. We are all the family of God – if you don't have people at home who you could regularly pray with, is there anyone in your church who might be in the same position, who you could meet with? Or are there families who you would feel able to approach and ask them to include you in their family prayers once in a while?
